

**REMARKS**

This is intended as a full and complete response to the Office Action dated January 7, 2005, having a shortened statutory period for response set to expire on April 7, 2005. Applicants have attached a Petition for a Month Extension of Time, in accordance with 37 C.F.R. § 1.136, extending the statutory period until May 7, 2005. Applicants request entry and consideration of the following remarks in response to the Office Action.

**CLAIM REJECTIONS:**

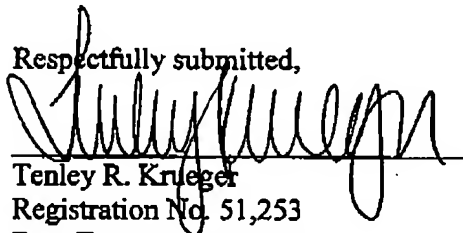

Claims 1-19 stand rejected under 35 U.S.C. §102(a) as being anticipated by U.S. Patent No. 6,593,442 (*Bidell*), U.S. Patent No. 6,072,005 (*Kobylyvker*) and U.S. Patent No. 6,037,417 (*Nguyen*).

Per the discussion of May 3<sup>rd</sup>, Applicants submit that the references, neither individually or in combination, teach, show or suggest the features of the pending claims. In particular, the references do not teach a biaxially oriented film of an impact copolymer polypropylene having a water-vapor transmission rate of greater than 5 and less than 25.

For example, *Bidell* teaches specific water vapor transmission rates outside of the recited range and further does not teach or suggest an impact copolymer as defined in the specification (*i.e.*, a homopolymer in combination with a copolymer.) (*See*, Table 3.) *Kobylyvker* teaches extremely high water vapor transmission rates (*see*, Column 11) and *Nguyen* does not teach or suggest an impact copolymer.

Accordingly, Applicants submit that the claims are in condition for allowance and respectfully request the same.

Respectfully submitted,

Tenley R. Krueger
